

Disclaimer & Installer Warranty

Precision Window Tinting, LLC 1-Year Installation Warranty

We provide a separate 1-year warranty on our professional installation to the original purchaser only. This covers defects in workmanship. To file a claim under either warranty, contact Precision Window Tinting, LLC first with clear photos and details. We reserve the right to inspect the vehicle before any claim is approved. **Warranty Exclusions & Voiding Conditions** The following are specifically excluded from both the manufacturer and Precision Window Tinting, LLC warranties and will void all coverage:

- Physical damage of any kind including rock chips, scratches, scuffs, gouges, tears, abrasions, burns, or impact damage (PPF is sacrificial; it is designed to absorb impact and show marks; this is not a defect)
- Damage caused by accidents, collision, vandalism, abuse, negligence, or acts of nature
- Improper maintenance or cleaning with petroleum distillates, acetone, brake fluid, strong solvents, abrasive compounds/polishes, or automated car washes with brushes
- Use of non-approved ceramic coatings or sealants after installation
- Failure to follow manufacturer-recommended care instructions
- Removal, alteration, or re-application attempts by any unauthorized party
- Pre-existing paint damage, rust, clear-coat failure, or stone chips present before installation
- Environmental or chemical staining not specifically covered by the manufacturer (e.g., rail dust, industrial fallout, tree sap, bird droppings left for extended periods)
- Normal wear items such as light surface scratches or swirl marks
- Negligent edge contact (parking too close to curbs, car wash damage, etc.)
- Warranties are void if any of the above conditions occur or if proper care guidelines are not followed.

Installation & Product Disclaimers

- Pre-Existing Paint Condition
- Customer acknowledges that paint must be in sound condition before PPF installation. Any existing clear-coat peeling, scratches deeper than the clear coat, rust, or contamination that becomes visible after film application is not covered. Customer accepts full responsibility for the condition of the paint prior to installation.
- Visible Edges & Seams
- Precision Window Tinting, LLC uses wrapped edges wherever possible; however, some areas (rocker panels, mirrors, door edges, etc.) may have visible film edges or small relief cuts for proper fitment. These are normal, unavoidable, and not considered defects.

- Minor dust particles, lint, or small nibs trapped beneath the film during installation are an unavoidable industry-standard occurrence in paint protection film application and are not considered defects or covered under warranty.
- Self-Healing Performance
- Self-healing occurs with heat (sun or hot water). Minor surface marks that do not fully self-heal in cold weather are normal and not warrantable.
- Color/Gloss Matching
- While every effort is made to match factory gloss levels, slight variations can occur due to paint age, batch differences, or orange peel in factory paint. This is not a defect.
- Authorization and Release of Liability
- Customer acknowledges that PPF installation involves thorough paint preparation, including possible polishing or contamination removal. Customer assumes all risk for any pre-existing paint issues that may surface during preparation or over time.
- By signing below, Customer releases Precision Window Tinting, LLC from any liability for pre-existing paint defects, minor dust/nibs trapped under film (industry-accepted), or any other non-workmanship-related issues.
