

## Automotive Window Tint Warranty and Disclosures

Precision Window Tinting, LLC installs premium LLumar and FormulaOne automotive window films. We stand behind our work and the manufacturer's quality with comprehensive coverage for eligible claims. Below outlines our warranties, exclusions, and important disclaimers. Please review carefully before installation. All warranties require proof of purchase and original installation by Precision Window Tinting, LLC.

### Warranty Exclusions

#### **The following are specifically excluded and will void coverage:**

- Physical damage (scratches, tears, gouges, burns) from pets, children, seat belts, keys, tools, cargo, accidents, vandalism, glass breakage, collision, or acts of nature.
- Rolling windows down too early (before full cure: 3–5 days, or longer in cold/humid conditions), causing edge pull-away, creases, or "fingers"—clear signs of premature use.
- Improper cleaning (ammonia cleaners, abrasive pads, razor blades, rough towels) or chemical exposure (solvents, acetone, bug/tar remover, gasoline).
- Picking, peeling, or attempting to remove bubbles/haze during curing.
- Drilling holes, applying stickers/decals, or any post-installation alterations to the film.
- Adhesives from suction cups, phone mounts, dash cams, or devices that cause ring marks, delamination, or tears (common and not covered).
- Removal or reinstallation by unauthorized third parties.
- Warranties void if terms are violated. Drive safely!

### Installation Disclaimers

#### **Front Windshield Film Authorization**

Customer acknowledges that applying film to the front windshield involves liquid solutions. Despite industry-standard protections (e.g., soap ropes, dash towels, absorbent barriers), moisture may enter behind the dashboard and cause damage to electronics.

Customer assumes all risk for damage to electronics, sensors, and wiring from installation fluids. Precision Window Tinting, LLC is not liable for repairs, costs, or losses. By authorizing installation (signature below), Customer accepts these risks and releases us from all claims.

#### **Rear Window Defroster Disclaimer**

Installation on rear windows with embedded defrosters (defogger lines) carries risk of damage to the defroster grid during film application or removal. Despite careful techniques, lines may break, leading to defroster failure. Precision Window Tinting, LLC is not liable for repairs, costs, or losses. By authorizing installation (signature below), Customer accepts these risks and releases us from all claims.
